KEY INSIGHTS

- The business achieved a massive milestone of \$2M in total between the years.
- Total gross profit reached \$286K while overall losses were contained at \$156K.
- Operations successfully processed a total of 9.994k orders.
- Business scaled upwards in May, reaching a major peak in July crossing 1000 customers mark.
- Sales reached an annual low in February and another drop in August
- Office supplies has the highest order count.
- High sales/customers in both New York and Los Angeles.

RECOMMENDATIONS

- Office supplies being top in volume can be used in cross selling higher margin items.
- A need for targeted promotions in February to encourage smooth revenue.
- More campaigns in April to have a higher increase in the months of May to July

Conclusions

Analysis proved that the business has built a strong \$2M sales, driven heavily by high-volume office supplies across major metro cities like New York and Los Angeles. However profitability is reliant on high predictable mid year seasonal surge.
